SKILLS

English

ASP.NET

ANGULAR 1,2

ReactJS

MEAN STACK

Database Design

GRUNT, WEBPACK

WEB API

Automation Test

BOOTSTRAP/MATERIALIZE/SASS

HTML/CSS/JS

+ TPF GROUP http://tpf.com.au

* KMS TECHNOLOGY (JUN 2016 - JULY 2016)
 Fresher trainning program for .Net developer . Skill and technology that I have learned :
  - ASP.NET MVC 5 : Building website with ASP.Net Mvc framework
  - Coding quality : Write high standard code with enterprise level
  - Rest API :
  - Unit test
  - HTML/CSS/JS/AJAX

* KMS TECHNOLOGY (MAY 2015 - DEC 2015)

-Project Description: Building website base on customer required.
- Industry: Nonprofit
- Project Team Size: 6
- Role(s): Handle all the request that customer submit.
Responsibilities:
- Received client required for their desired website, based on information given to build website.
 - Email customer if the information given is missing.
 - Report everything to Leader by the end of the day.

👥 PROJECT

AWESOME CMS CORE   **JAN 2018 - NOW**
FullStack developer & Automation Test

+ My Responsibility:
System design, Handle code refactor, optimize code, ticket refinement, writing Automation Test, Apply technology
+ Technology use in this project:
- ReactJS
- ReactStrap
- Webpack
- Drag&Drop (Self develop)
- NodeJS
- Chart.js
- ElasticSearch
- SQL Server
-Autofac
- Google Drive API
- ASP.Net Core 2.0
- OAuth
- Web API
- RabbitMQ
- Web job background task
- Specflow Automation

ADSLOT   **NOV 2017 - NOW**
FullStack developer & Automation Test

+ My Responsibility:
Handle code refactor, optimize code, ticket refinement, writing Automation Test
+ Technology use in this project
- ReactJS
- Webpack
- SQL Server
- ASP.Net
- Web API

Wordpress

Version Control

Progressive Web App

WCF

Redux

SignalR

Mobile

SQL

MONGODB

Redis

PHP

NODE JS

Python

INTERESTS

- TeamWork
- Video Game
- Swimming
- Football

- RabbitMQ
- Specflow Automation

ONLINE TRAINING   SEP 2017 - JAN 2018
FullStack developer

+ Project url : https://github.com/ngohungphuc/online-training
+Technology use in this project
-ASP.Net Core 2.0
-Gzip compression
-JWT Authentication with refresh token
-SignalR Core
-Elasticsearch
-Automapper
-MongoDB
-Webpack
-Angular 4 CLI
-Redux ,Effect
-SASS
-Bootstrap materialize design
-MongoDb
-DriverGoogle drive API
-Video streaming
-Web job background task

BLACK CAP   JUN 2017 - OCT 2017
FullStack developer

The application itself it a hybrid of linkedin and facebook for students which will onboard high
school students and follow them through into university and then finally as alumni. It will track
their interests and target them with trending data. Universities will have pages which can
advertise themselves and allow them to be ranked in a number of dimensions, Universities
will have Departments and organisational units below this level. Students will also have pages
which will allow them to post updates on their activities, upload picture and video media for
display in personal feeds as well as sharing. It will allow students to join Hubs and Groups
which focus on various topics such as clubs or social activities. Students can be ranked and
become Ambassadors or Role Models against Hubs or Groups and they can also follow other
students, Groups or Hubs.There will also be a big data element to this as student activity is
captured allowing for specific offerings from companies who may wish to hire them or
activities are suggested. It is expected that the data sets we will be working with will become
very large as this is rolled out worldwide. The application will need to be multi-lingual and
consideration should be put in to allow universities to be able to add the various language
texts without the need of intervention from BlackCap.

+ My Responsibility:
• Make the detailed designs for assigned tasks.
• Write code based on detailed designs and Functional/Requirement Specifications
• Incident and bug fixing
• Impment backend API
• Integrate API to frontend with Angular 4
• Refactor code
• Implement Elasticseach

+ Technology use in the project:
- .Net Core 2.0
- Angular 4
- Elasticsearch
- Redux
- SQL Server
- Web Socket

TPF GROUP   MAY 2017 - JUN 2017

Backend

http://tpf.com.au
Building TPF website with Wordpress & Bootstrap

UNIKREATIVE TEAMWORK — APR 2017 - NOW
Fullstack

https://github.com/ngohungphuc/unikreativ-teamwork
Building project management website using:
- ASP.NET Core & Entity Framework
- Automapper
- SQL
- Repository & Unit of work Pattern
- Bootstrap Materialize
- Angular 4
- Single page application

TDT FORUM — DEC 2016 - MAR 2017
Hệ thống tư vấn trực tuyến bằng MEAN JS

https://github.com/ngohungphuc/TDT-Forum
MEAN JS website with Android application to answer Ton Duc Thang University Student's
question when studying at school

SPLASHLING WEBSITE — NOV 2016 - DEC 2016
WEB DEVELOPER

http://splashlings.com/
- Frontend responsive design using Bootstrap 3
- Xml db
- ASP.NET MVC 5

SHOP PINK WEBSITE — NOV 2016 - DEC 2016
WEB DEVELOPER

https://shoppink.mcgrathfoundation.com.au/
- Frontend responsive design using Bootstrap 3
- Ajax Shopping Cart
- ASP.NET MVC 5

TPF THINK WEBSITE — AUG 2016 - DEC 2016
WEB DEVELOPER

TPFTHINK.COM.AU
- ASP.Net MVC 5
- XML database
- Frontend responsive design using Bootstrap 3
- Ajax Page

FREELANCER — JAN 2016 - APR 2016
Backend

https://github.com/ngohungphuc/Freelancer
Base on idea of https://freelancerviet.vn/ and http://www.freelancers.com.vn/
- Laravel php framework
- Bootstrap
- JS/Jquery/Ajax

🏆 CERTIFICATIONS AND AWARDS

Web Developer:PHP & MySQL	**JAN 2015**
Web Programming With PHP & MySQL	**JUN 2015**
Web Programming With CODEIGNITER	**AUG 2015**
Object Oriented Programming Fundamental With C#	**AUG 2015**
Window Forms Application With EF & WCF	**SEP 2015**
Web Application With ASP.Net MVC 5	**OCT 2015**
